
Working group Waste and Food services

In accordance with the [strategic materials](#) of Charles University for sustainable development, **expert working groups** (WG) were established for key areas of [Administration and Operations](#) . For the purpose of work efficiency and overlapping of sustainability topics, some key areas of Administration and Operations were merged into one WG ([Energy and Construction](#) , [Waste and Food services](#)). Thanks to the system of [SD Coordinators](#) and their partial involvement, the different WGs share the necessary information, thus ensuring transparency and efficiency in achieving common goals.

The WGs operate in a "**Guarantor - Co-facilitator - Member**" system, which proved its worth in the University Leaders in SDGs projects ([UNILEAD I and II](#)), which brought together 25 Czech public universities and operated from 2022-2023.

The Food services and Waste WG is primarily concerned with **sustainable meals, mapping current dining facilities in the CU and the waste stream.**

The members of the Waste and Food services WG are:

- Coordinator: Dana Kapitulčinová, Ph.D. (CU Environment Centre)
- Co-creators: Mgr. Pavla Čerychová (Faculty of Law); Mgr. Věra Dušková (Faculty of Physical Education and Sport); RNDr. Petra Innemanová, Ph.D. (Faculty of Science); Mgr. Miroslava Hurdová (Dormitories and Refectories)
- Members: Mgr., Ing. Nikola Rusová (UK Point, RUK)

The WGs, which aim to better coordinate activities at individual faculties and units of the CU, exchange experiences and try to move the CU as a whole towards more sustainable functioning based on specific objectives and activities, are supported by NPO 7.4 Green Skills and Sustainability Support at Universities (" [Green Skills at the CU](#) ").
